CENTRAL WISCONSIN ANESTHESIOLOGY, S.C. EARNS NATIONAL HONOR FOR SUPERIOR PATIENT SATISFACTION

SurveyVitals® releases its list of Top 10% performers for 2018

BOISE - SurveyVitals, a national health-tech firm specializing in patient satisfaction, released its list of top performing anesthesia organizations today. On the list, Central Wisconsin Anesthesiology, whose patient satisfaction scores outperformed those of thousands of anesthesia providers across the country in 2018.

“We are thrilled to highlight these organizations that have achieved this distinction,” said Bob Vosburgh, President of SurveyVitals. “Their commitment to excellence and doing right by their patients really shows and deserves to be rewarded.”

“At Central Wisconsin Anesthesiology, from our providers to our staff, patients truly do come first and I think that is reflected in our scores,” said Dr. Timothy Moran, President, Central Wisconsin Anesthesiology.

SurveyVitals digital solution allows patients to provide feedback via text message, email or interactive voice response calls, with both healthcare providers and administrators able to monitor real-time reporting through an online portal. Survey questions span the entire patient experience, asking patients for feedback about the scheduling process to wait times to their interactions with their healthcare provider and more.

Recipients of SurveyVitals Top 10% award were calculated using composite mean scores from over 1 million anesthesia patient satisfaction surveys completed in 2018.

Central Wisconsin Anesthesiology, S.C. (CWA) is the largest medically-directed provider of anesthesia services in north central Wisconsin. CWA creates a patient-focused perioperative experience by tailoring the highest quality anesthetic care to the individual needs of our customers and the community we serve; thereby maximizing quality, value and patient satisfaction.
